Introduction

The *Top Traffic Interchanges Report* is a biennial publication produced by the Metropolitan Area Planning Agency (MAPA) as part of its ongoing transportation planning process. The report is produced in conjunction with the *Traffic Flow Map*, the *Regional Traffic Patterns Report*, and the *Top Traffic Intersections Report*. The top traffic interchanges listed in this publication are based on data compiled by MAPA in cooperation with local, state, and federal agencies, as well as volume data obtained using the Streetlight Insight Planning tools, within the Metropolitan Planning Organization (MPO) Transportation Management Area (TMA).

This report presents Annual Average Daily Traffic (AADT) data for the Omaha-Council Bluffs metropolitan area from 2022-2025. Traffic volume estimates combine counts collected during the reporting period, older data updated through factoring and interpolation, and StreetLight estimates adjusted using available traffic counts. The report ranks intersections by estimated daily traffic, both within each county and across the region.

Methodology

This report is for interchanges only and, therefore, does not include information for intersections. Interchanges are separated road crossings that often interact through ramps. Locations such as 72nd & “L” Street, Saddle Creek Road & Dodge Street, and 72nd Street & West Center Road, which do not have an at-grade crossing, are considered interchanges and are included in this report. For information regarding intersections please consult the MAPA *Top Traffic Intersections Report*.

The interchanges in the report have been ranked based on total interchange volumes. The rankings present the AADT for each segment of roadway connecting at the interchange, or leg, as well as the interchange total. Interchange totals are calculated by adding the bidirectional traffic counts from each interchange leg and dividing by two, capturing the total number of vehicles passing through the interchange.

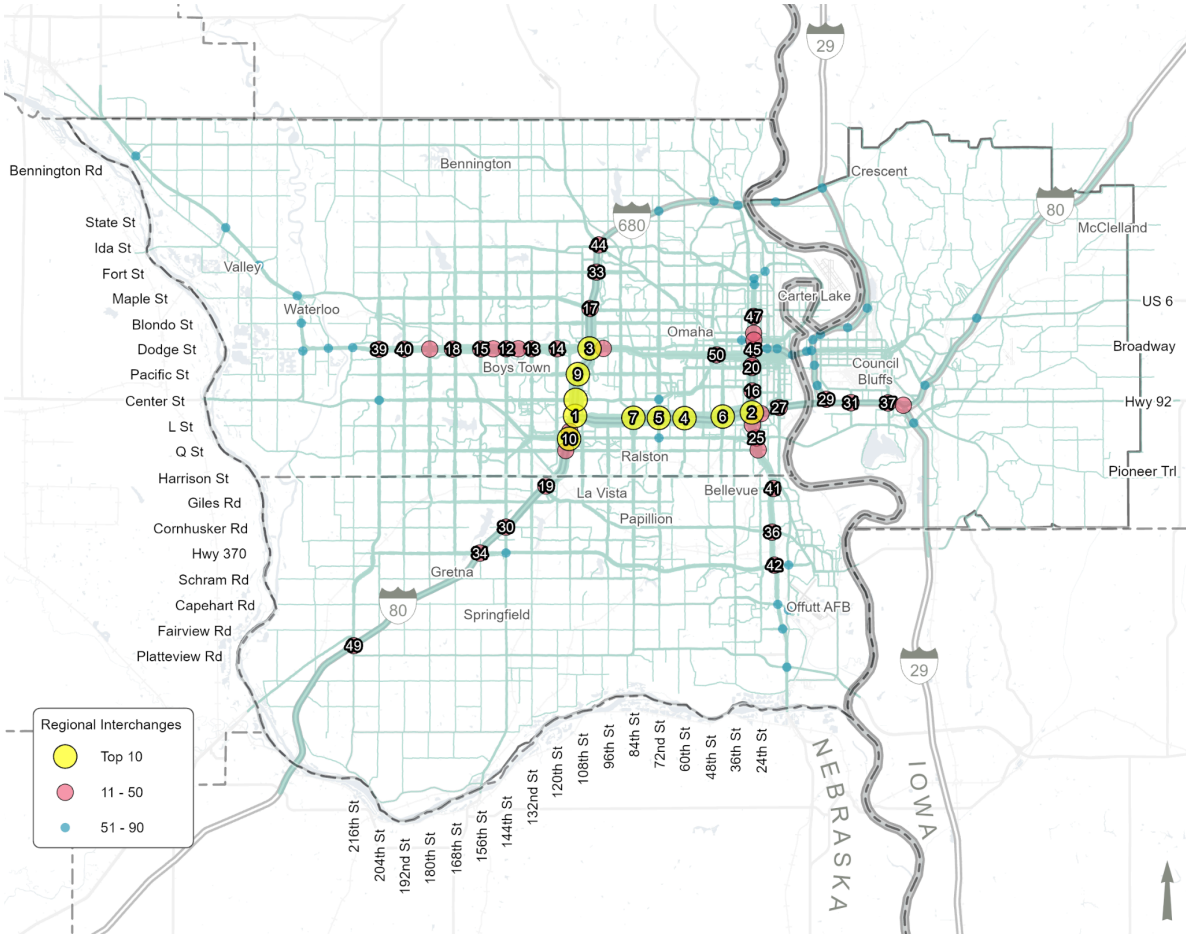

Interchange Rankings

The highest interchange traffic volumes are concentrated along I-80 and I-680 through Omaha. All ten of the highest ranked interchanges are in Douglas County. Of the regional top 50, 39 are in Douglas County, 7 are in Sarpy County, and 4 are in Pottawattamie County.

I-80 and I-680 rank first in the region, with an estimated 245,868 vehicles per day in 2025. The I-80 interchange with I-480 and the Kennedy Freeway follows at 238,060, while West Dodge Road and I-680 rank third at 225,292. Several I-80 connections with major Omaha streets, including 60th, 72nd, 42nd, and 84th Streets, also rank among the regional top ten.

In Sarpy County, the I-80 interchange at 126th Street and Harrison Street ranks highest, with an estimated 129,519.5 vehicles per day and a regional rank of 19. In Pottawattamie County, the western I-29 and I-80 interchange ranks highest, with 101,328 vehicles per day and a regional rank of 29. Figure 1 depicts a map of regional interchanges.

Figure 1: Regional Interchange Rank

County Interchange Rankings

The tables below present interchange AADT rankings by county. All interchanges with available data are included and listed in regional rank order, with traffic volumes shown for each interchange leg and the interchange total.
