Introduction

The *Top Traffic Intersections Report* is a biennial publication produced by the Metropolitan Area Planning Agency (MAPA) as part of its ongoing transportation planning process. The report is produced in conjunction with the *Traffic Flow Map*, the *Regional Traffic Patterns Report*, and the *Top Traffic Interchanges Report*. The top traffic intersections listed in this publication are based on data compiled by MAPA in cooperation with local, state, and federal agencies.

This report presents Annual Average Daily Traffic (AADT) data for the Omaha-Council Bluffs metropolitan area from 2022-2025. Traffic volume estimates combine counts collected during the reporting period, older data updated through factoring and interpolation, and StreetLight estimates adjusted using available traffic counts. The report ranks intersections by estimated daily traffic, both within each county and across the region.

Methodology

This report is for intersections only and, therefore, does not include information for interchanges. To qualify as an intersection, it must have an at-grade, or same-level, crossing. Locations such as 72nd & "L" Street, Saddle Creek Road & Dodge Street, and 72nd Street & West Center Road do not have an at-grade crossing and are considered interchanges. These locations and others with similar configurations are excluded from this report. For information regarding interchanges, please consult the MAPA *Top Traffic Interchanges Report*.

The intersections in the report have been ranked based on total intersection volumes. The rankings present the AADT for each intersection leg as well as the intersection total. Intersection totals are calculated by adding the bidirectional traffic counts from each intersection leg and dividing by two, which captures the total number of vehicles passing through an intersection.

Intersection Rankings

Douglas County contains 45 of the region's 50 busiest intersections, with the other five in Sarpy County. Sarpy County's highest ranked intersection, 72nd Street and Highway 370, carried an estimated 54,948 vehicles per day in 2025 and ranked 29th regionally. Here, traffic on 72nd Street between Omaha and Sarpy County meets Highway 370, which connects Gretna, Papillion, and Bellevue.

90th Street and West Dodge Road remains the region's busiest intersection, with an estimated 95,431 vehicles per day. West Dodge Road and 96th Street ranks second at 80,679, followed by 72nd Street and Dodge Street at 79,745. Several other intersections along West Dodge Road are also among the regional top ten. Dodge and West Dodge carry traffic between residential neighborhoods and destinations along the corridor, including Westroads, UNO, medical facilities, and downtown Omaha. Figure 1 shows a detailed map of intersections within the regional top 50.

Figure 1*: Top 50 Intersections*

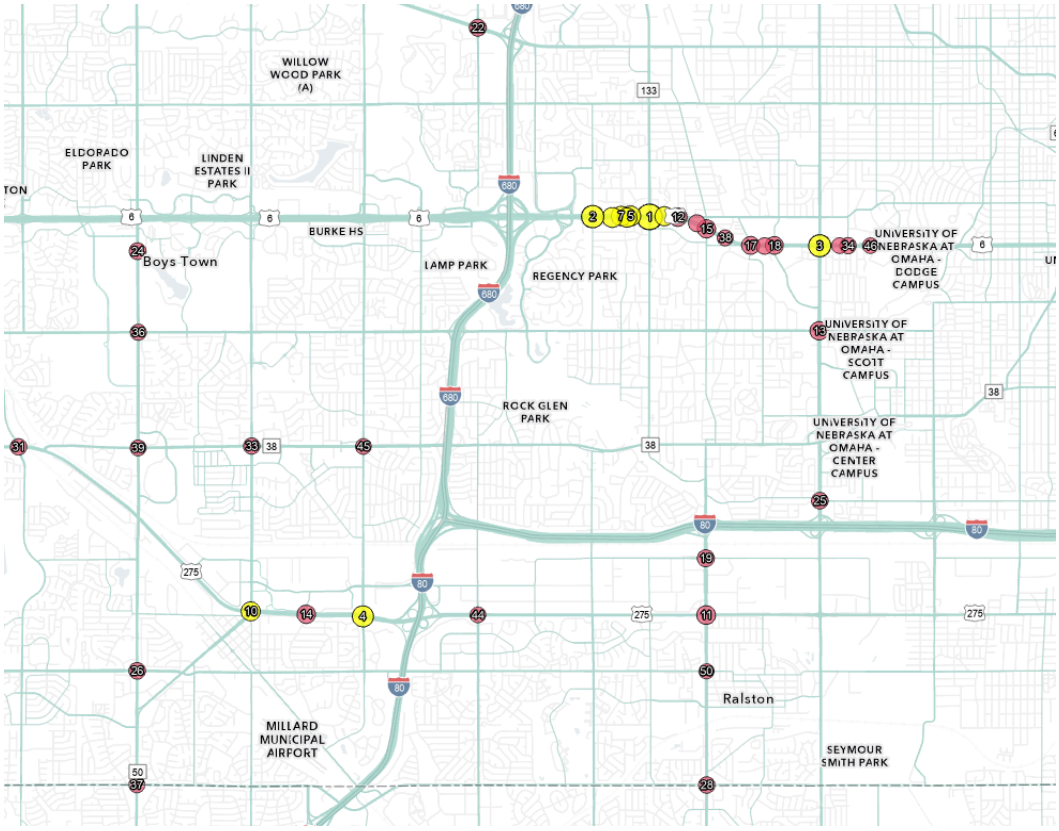

Figure 2 shows intersection rankings across the region. Douglas County accounts for 426 of the 500 highest volume intersections, followed by Sarpy County with 69 and Pottawattamie County with five. In Pottawattamie County, Abbott Drive and East Locust Street ranks highest, with an estimated 30,392 vehicles per day and a regional rank of 365.

Figure 2: *Regional Intersection Rank*

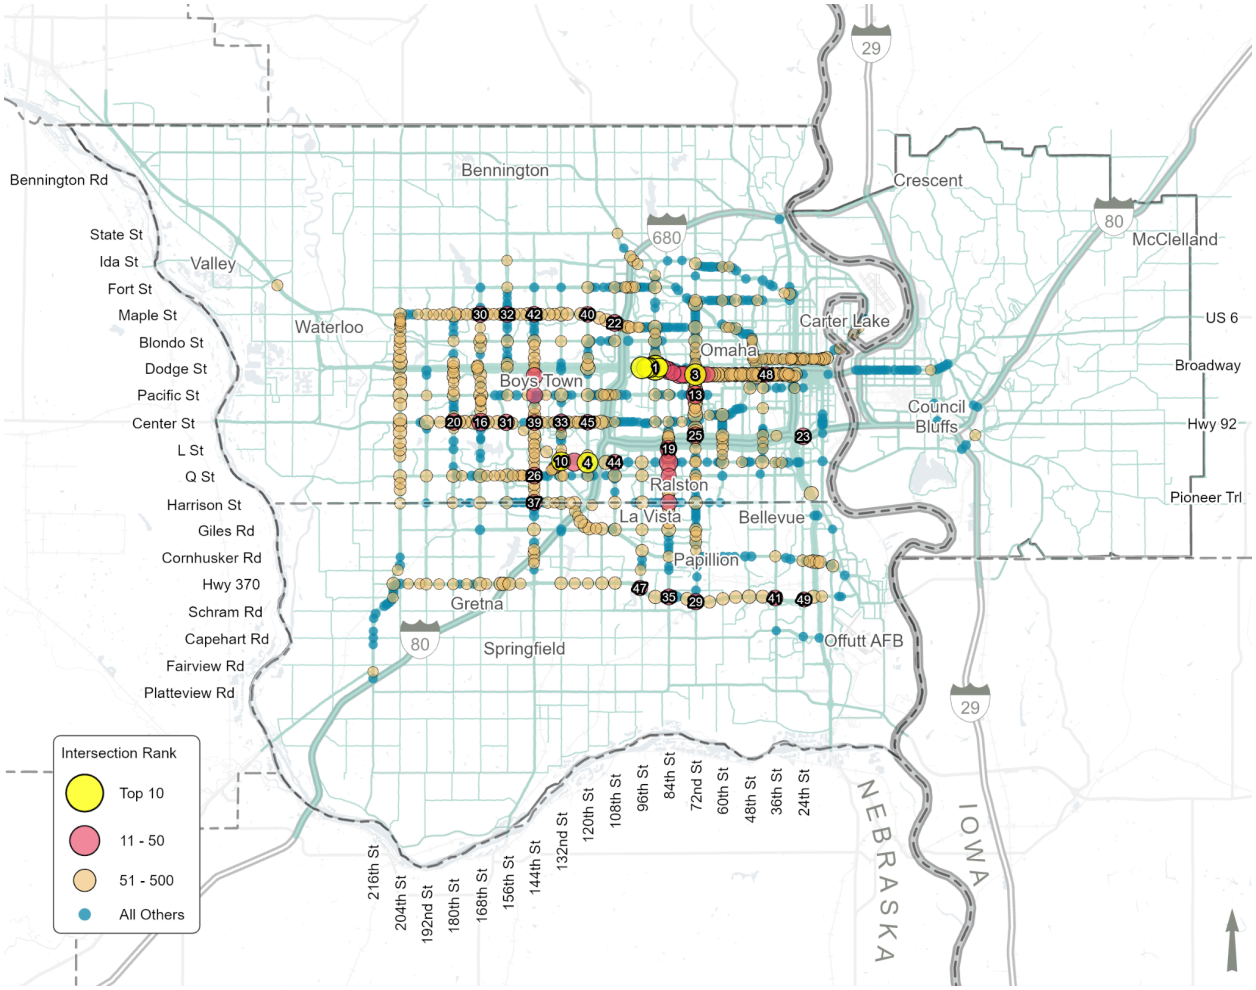

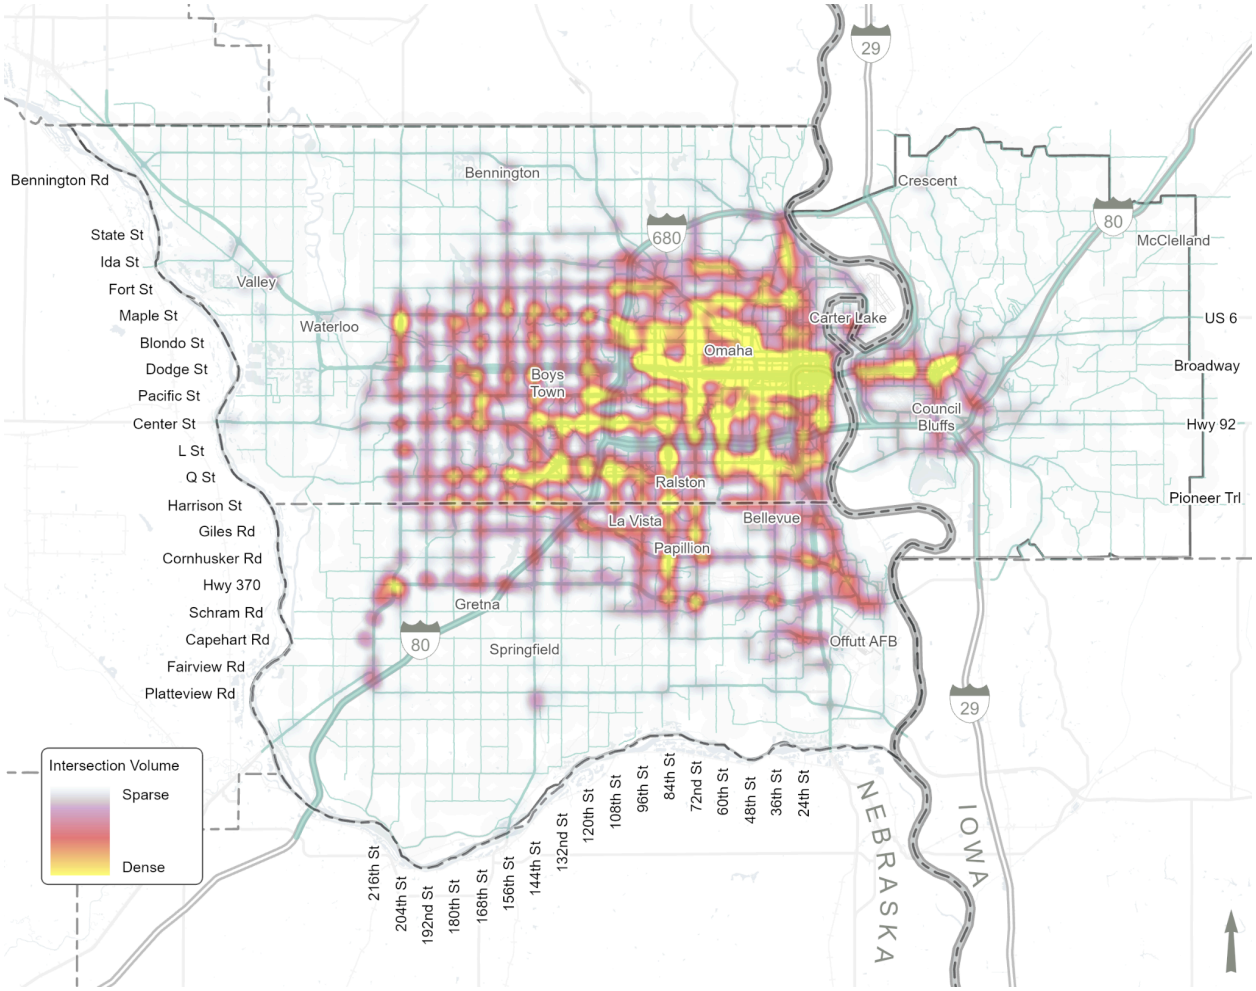

Figure 3 shows where high intersection traffic volumes are concentrated across the region. The most prominent concentration follows Dodge Street and West Dodge Road, with other clusters along major roads through Omaha. Additional concentrations appear in Sarpy County and along Broadway in Council Bluffs.

Figure *3: Regional Intersection Volume Heat Map*

County Intersection rankings

The tables presented in Appendix A show the intersection Annual Average Daily Traffic (AADT) rankings by county. All intersections with available data are included and listed in regional rank order, with traffic volumes shown for each intersection leg and the intersection total.
